

**Tool-profile x memory experiment: final statistical outcome (n=10 per condition, bootstrap 95% CI)**

Positive bars in D-F favor memory-on. Tool profiles: no tools, basic tools, full tools, faulty tools.

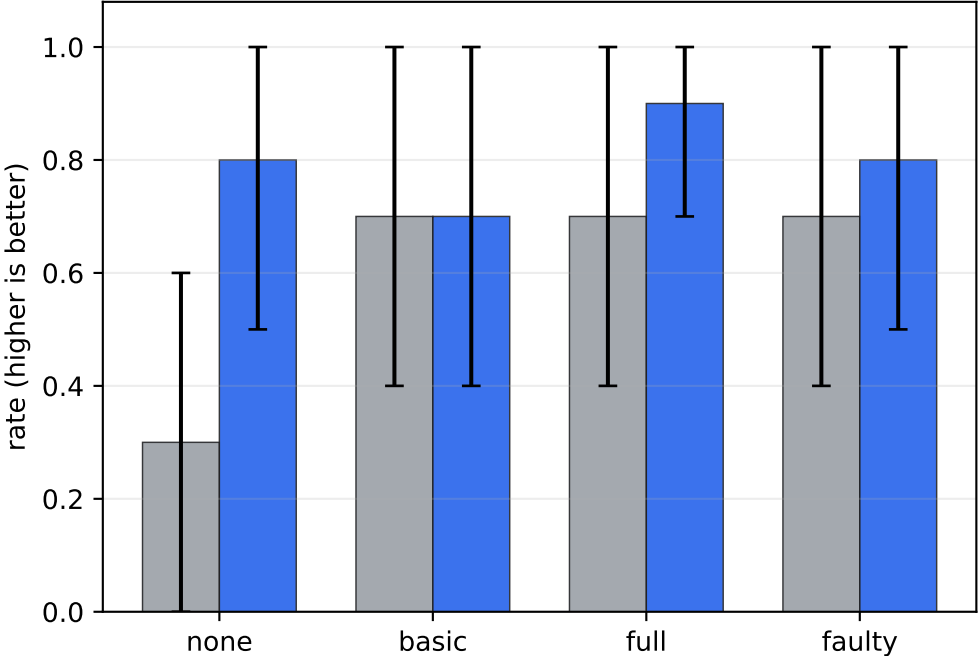

**A. Mean negotiation duration**

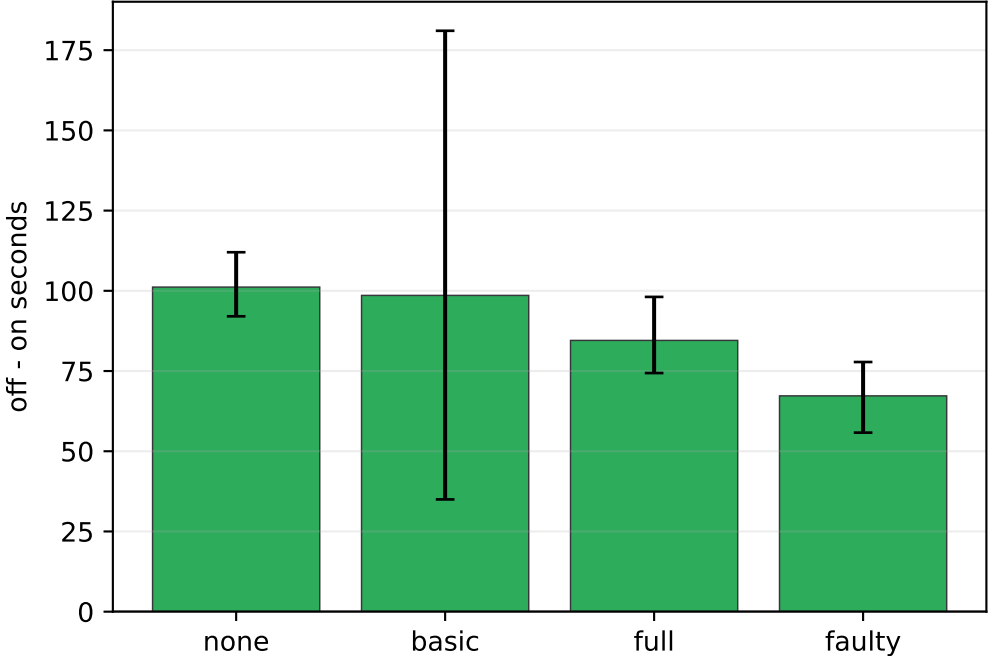

**B. Mean QoS effect score**

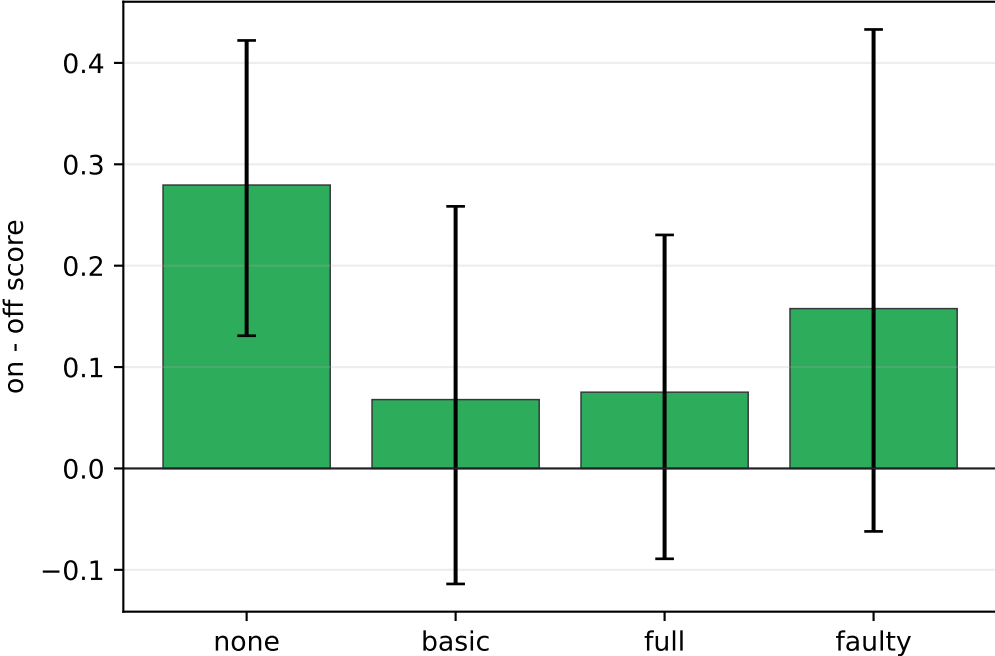

**C. Mean negotiation success rate**

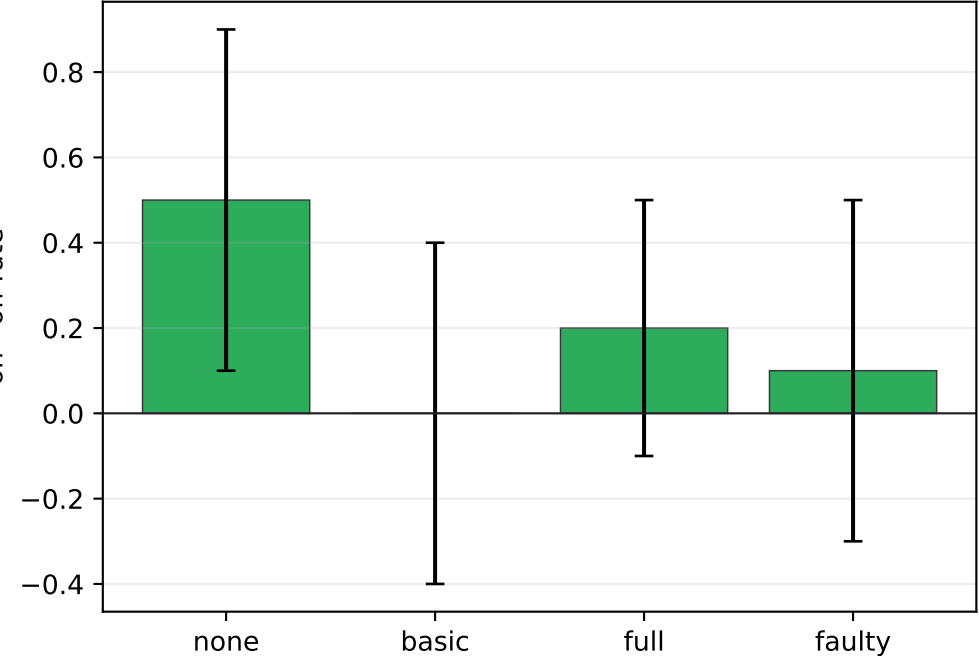

**D. Memory advantage: duration reduction**

**E. Memory advantage: QoS effect gain**

**F. Memory advantage: success-rate gain**

memory off    memory on    memory advantage
